

Environmental Guidelines

Introduction

Florin AG, as the largest producer of vegetable oils and fats in Switzerland. We are aware of the impact our business has on the environment.

The cultivation of raw materials for our products has a global impact on people, animals and the environment. We have a positive impact on them and work closely with our suppliers and partners to reduce the environmental and social impact along the entire value chain.

We continuously analyze the implementation process and participate in a regular review and improvement processes. To implement this policy, we engage stakeholders wherever relevant and necessary. The implementation is carried out up to an attainable extent for the satisfaction of our customers, employees, and the community.

We continuously improve this policy and ensure that it is consistent with our vision, mission, and corporate policies, as well as laws and international guidelines.

Scope

We give preference to suppliers who implement following principles throughout their operations. By implementing this policy, we seek the support of stakeholders such as suppliers, customers, governments, non-governmental organizations, and other relevant organizations as needed.

Principals

1 Legal Requirements

- All applicable national laws, regulations, international agreements, and conventions.

2 Continuous Improvement

- Establish continuous improvement programs along the entire value chain, to reduce environmental impact.

3 Quality

- Ensuring the quality of products with resource-saving production along the value chain (promoting the circular economy for all materials used).

4 Increased Effectiveness

- Climate protection: SBTi-Commitment (reduction of CO₂ emissions, energy consumption, air quality)
- Water management: reduction of water consumption and wastewater production
- Raw material resources / productivity
